

New!

Show Halter Sets

September, 2020

Helpful Tutorials!

for some how-to info and tips: www.riorondo.com/info/reference/tutorials/

Almost all the parts you need to create a Western-Style Show halter with all the bling! Choose from 10 different Trad. Scale designs and 2 in Classic size.

Each set contains enough parts to create a fully adjustable show halter, or you can assemble your halter in simpler styles. All you need to add is the leather lace, and a small piece of chain and a jump ring for the lead shank.

 Classic Scale Show Halter Set—21 Pieces

NEW! Glue Squares!

Removable Glue Dots

Glue Dots® brand 3/16" Removable Squares are fantastic for temporarily attaching bit shanks to your models.

- Leaves no residue on models
- Easy to remove
- Holds up in warm temps

These thin squares are useful for tacking down wayward straps, dolls holding reins, and many other uses for both display and model showing!

We find this product superior for attaching bits compared to the customary tacky wax.

Sold in a handy dispenser pack of 450.

GL236 - 450 Glue Squares - \$7.75 each

POUNCE WHEEL

This rolling wheel has 24 teeth per inch, to create evenly-spaced tiny "stitch hole marks" to add detail to saddles and many other tack items.

5.25" handle with 1/4" wheel.

TL162—\$9.80

BEAD PICK/AWL

TL843—\$3.35

The sharp tiny tip on this Bead Pick will allow you to snag the tiniest beads, as well as easily poke holes through thin leathers. 6.25" long with Soft-Grip handle.

Tooling Goat & Sheep Leathers

These new tooling leathers are firm-bodied vegetable-tanned leather with a fine, tight surface grain. Tooling goat is available in 2 thicknesses.

.6mm Fine Tooling Goat also is firm-bodied but quite thin, yet still accepts tooling. Suitable for small-scale saddles or projects that require less bulk than other veg-tan leathers. Also suitable for filigree, inlays or overlays and lightweight items such as saddlebags, scabbards and other small cases. .9mm Tooling Goat is like our other Cow and Calf leathers, but is a bit firmer, with a tighter surface grain. Tooling Goat leathers tend to include some surface color variance.

Tooling Sheep runs a little thicker than regular Tooling Cow, at about 1.3mm. It has bit of a buttery feel, and has a bit of stretch compared to goat leathers.

GTF7 -Fine Tooling Goat 8.5x5.5" .6mm	\$5.00 ea.
GT02 -Tooling Goat 8.5x5.5" .9mm	\$3.50 ea.
GT06 -Tooling Goat scrap bag (.75oz)	\$1.25 ea.
SHP2 -Tooling Sheep 8.5x5.5" 1.3mm (.75oz)	\$3.50 ea.

Euro-Veg Tooling Cow

Euro-Veg leather is slightly thinner (.9-1.1mm) than tooling cow, and has a somewhat softer feel than standard Tooling Cow.

LVT18 -Euro-Veg Tooling 8.5x5.5"	\$8.50
LVT21 -Euro-Veg seconds	\$4.50

JUMP CUPS

Some assembly required

Use these resin jump cups to easily place the rails on any jump. Cups fit 3/8" square wooden dowels.

A set contains the jump cups, cotter pins, chain and jump rings for assembly. Jump cups come in grey-colored resin, which can be painted any color, as well as sanded, drilled, modified etc.

JC138 Jump Cups \$4.50/pair

BIJOUX ONE-EAR PLATES

Matching One-Ear plates go with our rails for small-scale bridles. This special shape will bend to nicely fit around most ears...just trim the extra length from each end. Can be glued in place or add sliding loops to the ends.

\$1.25/4

Bijoux WESTERN SADDLE TREE

1:18 Bijoux scale Western Saddle Tree set in resin for small-scale models ranging from 3 to 3.5" high at the withers. Can be sanded, carved, trimmed or built up with putty to customize.

TR744 Bijoux Western Tree

\$6.00/set

Resin Stirrups

These new resin stirrups in tan color are easily painted to simulate a wood-grain look. Alternatively, the western stirrups can be covered in leather. (US Cavalry stirrups traditionally are made of wood and uncovered.)

Tan Resin

US Cavalry Stirrups
